DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: please provide updated information of continuity data in the first paragraph of the specification, such -- as now U.S. Patent No. 6,719,694 --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Granz et al. (US 5,526,815).

Granz teaches in col. 1, line 65 - col. 3, line 33, teaches a method for ultrasound therapy and diagnosis comprising the steps of selectively energizing the ultrasound transducers (see Figs. 2 and 3) in one of an imaging mode and a therapy mode. Granz further teaches that the transducers are selectively energized to change the frequencies (quality factor) so that it could perform the intended procedure, e.g., therapy or diagnosis.

Allowable Subject Matter

4. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3737

5. Claims 6-28 are allowed.
